**The Green Tape platform goes beyond being just a modern enterprise SaaS procurement solution built on Cloud.** It is a new easy way of doing business. The platform provides full automation and a choice of multiple buyers and suppliers at your fingertips.

### A network **without borders**

Green Tape is a platform that creates a network of buyers and suppliers across geographies. This gives businesses access to a multitude of suppliers that meet quality, price, ESG and other company specific evaluation criteria for goods and services. It gives suppliers access to an extensive marketplace to sell their goods and services.

## How the Green Tape platform **benefits suppliers**

### Extensive network of buyer companies

The platform allows your company to conduct business with a multitude of buyer companies and their subsidiaries who are on the platform.

Green Tape GroupBuy delivers high volume orders to suppliers, by aggregating several buyer companies' common requirements. By signing up, suppliers get notified of bulk orders and are invited to bid.

### Convenience

Using the platform's clean, straightforward and user-friendly interface, suppliers are able to conduct all transactions on-line through their computer/phone.

### Never miss out on a tender

Both suppliers and buyers are informed via their inbox whenever a new tender and associated actions related to their interest are launched, without having to look for it.

### Your company will be known in the market

- ▶ The ability to customise your company profile according to what buyer companies require.
- ▶ The ability to be seen by buyer companies wanting to purchase goods that your company sells.
- ▶ The ability to use your company profile to market your expertise, capabilities, and experience as a provider of services.

### Level playing field

Whether you are a big or small company, transparency of the tender process ensures fair business practices are followed and that every company competes on a level playing field.

### Efficient and secure process

Receipts and notifications can be obtained straight from the portal and the payment options and payment confirmation process is straightforward.

Encrypted data ensures safety of all transactions and quotations.
